~~1001 celestial wonders as observed with home built ...~~

~~In the July 2016 issue of Sky & Telescope, Jim Mullaney presents "A Forgotten Observing Classic": the story of Charles Edward Barns and his delightful 1927 amateur-astronomy guide 1001 Celestial Wonders as Observed with Home-Built Instruments. Today Barns's reputation, to the extent that the amateur community knows of him at all, stems from his colorful and evocative descriptions of the 1,001 telescopic sights in his book.~~

1,001 Celestial Wonders is a guide to the night sky's brightest and most fascinating objects. Each target is accessible to amateur astronomers using medium-sized telescopes from a dark site. In fact, many are so bright they remain visible under moderate light pollution, as from the outskirts of a city or the suburbs of a town. The book provides a chronological target list, making it easy to use. No matter what night you choose, this book will show you many of the most memorable objects to observe, whether you are using a small telescope or even binoculars, or an instrument of larger aperture. This is far more than just a list of interesting objects. It is structured so that objects of various observing difficulty are included, which will help readers become better observers, both encouraging beginners and challenging long-time amateur astronomers. This book is designed to be easy-to-use at the telescope, and observers will appreciate each object's

standardized layout and the book's chronological organization. Finally, many amateur astronomers function best when presented with a list! Even the Meade Autostar® controller features a 'best tonight' list (although the list is far less comprehensive and detailed than the catalog provided in this book), a feature that has proved extremely popular. 1,001 Celestial Wonders offers a life-list of objects any observer would be proud to complete.

Part 1, Books, Group 1, v. 25 : Nos. 1-121 (March - December, 1928)

Timeless, comprehensive coverage of telescopes, mirrors, lenses, mountings, telescope drives, micrometers, spectroscopes, more. ". . . highly recommended for very serious nonprofessional astronomers." — A Guide to the Literature of Astronomy. 189 illustrations. Reprint of 1971 edition.

Sky & Telescope contributing editor Stephen O'Meara presents month-by-month selections from Scotty Houston's popular Deep-Sky Wonders column, which ran from 1946 until 1994 (after his death in December 1993). Each chapter includes commentary by O'Meara and a table showing the location and character

"Library catalogue in 1911" (31 p.) appended to v. 4.
