Act

ACT. Acceptance and Commitment Therapy. ACT differs from CBT in that instead of challenging distressing thoughts by looking for evidence and coming up with a more rational response (CBT), in ACT, the thought is accepted as a thought, e.g. "I'm having the thought that this boat is going to sink", and then defused using a variety of techniques, which may include mindfulness, metaphors and language.

Psychological name from one of its core messages: accept what is out of your personal control, and commit to action that improves and enriches your life. The aim of ACT is to maximise human potential for a rich, full and meaningful life.

~~Acceptance & Commitment Therapy – ACT Mindfully~~
Acceptance and Commitment Therapy (ACT) is a “third-wave” cognitive behavioral intervention aimed at enhancing our psychological flexibility (Hayes et al., 2006). Rather than suppress or avoid psychological events, ACT is based on the belief that acceptance and mindfulness are more adaptive responses to the inevitabilities of life.
