GPS receivers use different numbers of channels to track the satellites. The more channels a receiver has the more chance the unit will find the satellites and pinpoint your location. Power Having external power capability is a nice feature if you using a GPS in the car and can save a lot of batteries.

GPS buyer's guide - Ramblers

GPS works by receiving a signal from a satellite in orbit. By measuring the precise distance to at least five different satellites, the device can work out exactly where you are. As it's receive only, and the satellites orbit the whole planet, you can get a GPS position almost anywhere, and you do not need a mobile phone

Best Truck GPS Buying Guide

FAQ: Q: How often will my GPS send updates? A: The number of times that your truck navigation system sends updates depends on the specific model that you buy. Some will update on a more regular basis to tell you about changes on the road such as speed limits, construction projects, and points of interest along the way.

No matter what you're doing in the outdoors, you may need help navigating from place to place—and remembering how to get back. A compass and a map are excellent tools, and knowing how to use them will make it even easier to learn how to use your Global Positioning System unit. The author has been involved with teaching people how to use GPS for many years. In this book he shares the answers to all the questions a novice might ask: What is GPS? How does it work? How accurate is it? Does it work anywhere? Is it for traveling on land as well as on the water? and more. Topics include: straight-line navigation, getting around obstacles, uploading maps and databases, entering waypoints,
