Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win †? situation so that climate change policies

contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

Updated and revised, this is a new edition of one of the best-selling advanced microeconomics texts to be published in Europe. This well informed book provides a comprehensive exposition of modern microeconomic theory, covering many of the issues currently being researched and debated. The book offers very rigorous, mathematical treatment of the topics discussed making it appropriate for graduate as well as able intermediate level students. The writing style is clear and concise and the book is particularly liked for the thoroughness with which the concepts are dealt.
