Network topology refers to how the nodes and links in a network are arranged. A network node is a device that can send, receive, store, or forward data. A network link connects nodes and may be either cabled or wireless links. Understanding topology types provides the basis for building a successful network.

The Fundamentals of Networking | IBM

David Isenberg, "Rise of the Stupid Network". 1997 ; An interesting discussion on "stupid" and "intelligent" networks. A strong recommendation to read. David P. Reed, Jerome H. Saltzer, and David D. Clark, "Comment on Active Networking and End-to-End Arguments". IEEE Network 12, 3 (May/June 1998) pages 69-71.
