You can run the API Gateway installer in unattended mode on the command line. The following command shows an example of installing the API Gateway component only, without the QuickStart tutorial: Windows. OAG-11.1.2.2.0-windows-installer.exe --mode unattended --enable-components nodemanager --disable-components analytics,policystudio,apitester,configurationstudio.

Installing the API Gateway Core Server - Oracle

Overview of API Gateway. The API Gateway service enables you to publish APIs with private endpoints that are accessible from within your network, and which you can expose with public IP addresses if you want them to accept internet traffic. The endpoints support API validation, request and response transformation, CORS, authentication and authorization, and request limiting.
