3 Effective palliative care provides a direct benefit to the child as well as being an important preventive health intervention for the family, with long term implications for family functioning, mental health, education and employment. The long-term negative effects of grief have been powerfully confirmed through recent experience with bereaved families as part of the Autopsy Inquiry at the Royal Children's Hospital, Melbourne.

## ~~Palliative care : About palliative care~~

Filed under: paediatric palliative care, palliative care. This network brings together representatives of children and young people with palliative care needs, their families, commissioners and providers of children's palliative care from NHS, non-NHS, voluntary sectors, social services and education, across primary, secondary and tertiary care with the aim of improving co-ordination, availability and delivery of palliative care.
