Archaeological resources are typically evaluated through a three-step process. The first step, Stage 1, consists of documentary research using historic (primary) and secondary sources to determine the likelihood that archaeological resources that may be eligible for listing on the Registers may be present in the APE.

Appendix H: Archaeological Resources A. INTRODUCTION AND ...

Long-toed shoes had been popular in Europe at different times, first appearing in the archaeological record in the 12th century and falling in and out of fashion periodically. They reached their most exaggerated form in the third quarter of the 15th century before falling out of fashion in the 1480s.

Stepping through time : archaeological footwear from ...

Footwear has been considered a necessity throughout history and examples have been recovered from archaeological sites worldwide. We have found 11 remnants of footwear from Queen Anne's Revenge: 10 shoe buckle fragments and a leather fragment with wooden pegs believed to be associated with a stacked-heel leather shoe.

Artifact of the Month: The Sole Survivor | Queen Anne's ...

In attempts to test these archaeological assumptions, to study the ways in which artifacts may vary through time, and to place these variations in a cultural perspective, historical archaeologists James Deetz and Edwin Dethlefsen pioneered the archaeological study of Early American gravestones during the 1960s. They rightly considered ...

Early American Gravestones - Archaeology Magazine Archive

History of calceology. Among the early studies of footwear from European archaeological excavations, Roman period footwear figures prominently followed by medieval period finds. Scientifically based research was first applied to Roman period finds and later for prehistoric and primitive footwear. With the development of the Goubitz notation system, the technical aspects of the recovered shoe fragments could be clearly presented, allowing researchers a coherent scientific base for leather ...
