For introductory courses in computer concepts, digital literacy, or computer literacy, often including instruction in Microsoft Office. Explore, discover, and experience technology with the interactive and adaptive *Technology in Action* --the book that uses technology to teach technology! This book offers a learning system that pushes the envelope of what is possible in technology, and what is helpful in teaching. Although students are more comfortable with the digital environment than ever, their knowledge of the devices they use every day is still limited. The authors focus on tasks that students can accomplish with their devices, and skills they can apply immediately in the workplace, the classroom, and at home. This book fits the way students are learning today. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content. Students, if interested in purchasing this title with MyITLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information

In today's technological age, computer literacy is important for everyone, and now learning the basics is easier than ever. This title engages students by combining a unique teaching approach with rich companion media.

Features Part of the GO! Series - this concepts book is super hot! TOC is organized in the same way a student would use a computer - keeps students engaged Each section starts with a question - students believe they are having a conversation with the authors Unique and outstanding multimedia tied to the text can be found at www.prenhall.com/techinaction Typical Competitors Discovering Computers, Shelly Cashman (Course Tech) O'Leary (McGraw Hill) Computers, Fuller (Paradigm)

“A fascinating survey of the digital age . . . An eye-opening paean to possibility.” —The Boston Globe
“Mr. Shirky writes cleanly and convincingly about the intersection of technological innovation and social change.” —New York Observer
An extraordinary exploration of how technology can empower social and political organizers For the first time in history, the tools for cooperating on a global scale are not solely in the hands of governments or institutions. The spread of the internet and mobile phones are changing how people come together and get things done—and sparking a revolution that, as Clay Shirky shows, is changing what we do, how we do it, and even who we are. Here, we encounter a woman who loses her phone and recruits an army of volunteers to get it back from the person who stole it. A dissatisfied airline passenger who spawns a national movement

by taking her case to the web. And a handful of kids in Belarus who create a political protest that the state is powerless to stop. Here Comes Everybody is a revelatory examination of how the wildfirelike spread of new forms of social interaction enabled by technology is changing the way humans form groups and exist within them. A revolution in social organization has commenced, and Clay Shirky is its brilliant chronicler.

New York Times bestselling author Michael Crichton delivers another action-packed techno-thriller in State of Fear. When a group of eco-terrorists engage in a global conspiracy to generate weather-related natural disasters, its up to environmental lawyer Peter Evans and his team to uncover the subterfuge. From Tokyo to Los Angeles, from Antarctica to the Solomon Islands, Michael Crichton mixes cutting edge science and action-packed adventure, leading readers on an edge-of-your-seat ride while offering up a thought-provoking commentary on the issue of global warming. A deftly-crafted novel, in true Crichton style, State of Fear is an exciting, stunning tale that not only entertains and educates, but will make you think.

Recently the alarm has been raised – basic freedoms are under attack in our universities. A generation of ‘snowflake’ students are shutting out ideas that challenge their views. Ideologically motivated academics are promoting propaganda at the expense of rigorous research and balanced teaching. Universities are caving in and denying platforms to ‘problematic’ public speakers. Is this true, or is it panic and exaggeration? Carolyn Evans and Adrienne

Read Online Technology Action Complete Evans Alan

Stone deftly investigate the arguments, analysing recent controversies and delving into the history of the university. They consider the academy's core values and purpose, why it has historically given higher protection to certain freedoms, and how competing legal, ethical and practical claims can restrict free expression. This book asks the necessary questions and responds with thoughtful, reasoned answers. Are universities responsible for helping students to thrive in a free intellectual climate? Are public figures who work outside of academia owed an audience? Does a special duty of care exist for students and faculty targeted by hostile speech? And are high-profile cases diverting attention from more complex, serious threats to freedom in universities – such as those posed by domestic and foreign governments, industry partners and donors?
